STANLEY

# Ahead of the game...

# BOSTITCH®

**With increasing pressure for faster production and repair turnaround in the Pallet & Crate industry, the need for efficient tooling has never been greater.**

With vast experience in tool development for specific applications, Stanley Bostitch have the inside track on practical solutions to Pallet & Crate making operations.

Our close relationship with our customers means that we respond to their needs first and foremost. From Pneumatic Nailers to Capital Equipment installations, Stanley Bostitch provides a full service.

### Leading Edge Design

Any manufacturing operation relies on the comfort and safety of its operators. Fast, dependable equipment and minimal downtime are key elements to cost efficient production. The new range of Coil Nailers, developed specifically for the industry, incorporate many advanced features. Compact and lightweight construction, dust and

debris guards and improved driving power make them easier and safer to use- all day long. Designed for easy repair and maintenance, Stanley Bostitch tools stay where they belong- in use.

### Tested To Destruction

Like all our tools, the new Stanley Bostitch range of Coil Nailers undergoes a punishing test programme based on real working environments before being approved for release. Each and every one of our tools is cycled before dispatch to ensure consistent high performance from day one.

### Fastener Range & Quality

As one of the largest fastener suppliers in the world, our experience allows us to produce cost effective fasteners to the highest certified standards. Our fasteners -like our tools- are the result of extensive research and development in conjunction with real application needs.

In addition to our standard ranges, specialist materials and finishes can be accommodated where necessary.

This document represents the core range of our Pallet & Crate Nailing tools. For more information, contact your local sales representative.

### Capital Equipment

Stanley Bostitch offer a range of fully automated systems designed for high volume manufacture. For details contact: **0870 1 630 630**

## N58C-1-E

2.68Kg

### Ergonomic design for improved operator comfort

The N58C-1-E features a new compact nose and contact arm design which means that the tool is easier to place, and gives the operator more control compared to previous models. The tool has been made more comfortable to use by redesigning the handle and with safety in mind a new dust and debris guard has been included.

Durability is standard. With Steel frame protectors and a steel lined nail canister, the N58C-1-E is a real workhorse.

For production environments, there's a port to accommodate counterbalancers and the new canister design gives greater bench stability.

**Compact nose and contact arm** - for improved sightline and accurate placement

**Lined nail canister with twist adjust mechanism** - For reduced wear and fast nail size changes

**Dust & debris guard** - giving operator protection from flying dust and debris

**Oversize magazine** - Easy access & greater bench stability

**Integral mounting port** - for mounting onto counterbalanced rig

**Top/bottom steel frame protectors** - Added protection against damage

**Rubber comfort grip and compact handle design** - Improving operator comfort & grip

## N64084-E

2.63Kg

### Up to 25% more power than the other tools in its class

Packing greater driving power, the N64084-1 is a top line Pallet & Crate fastening tool.

With oversize magazine and incorporating a twist-to-select fastener settings for quick size changes, and a multidirectional exhaust, the N64084-E is set to become a firm favourite within the industry.

N64084-E fires a range of fastener from 30mm to 64mm making it versatile too. With rubber comfort grip handle and dust and debris guard, operators will find it safe and comfortable.

**Compact nose and contact arm** - for improved sightline and accurate placement

**Dust & debris guard** - giving operator protection from flying dust and debris

**Top/bottom steel frame protectors** - Added protection against damage

**Oversize magazine** - Easy access & greater bench stability

**Multi-directional exhaust** - To blow debris away from operator/job

**Integral mounting port** - for mounting on counterbalanced rig

**Rubber comfort grip and compact handle design** - Improving operator comfort & grip

### Innovative Accessories

Like all our tools, the Pallet Spacer Bar **SB-PSB** is fast, easy to use and saves time. For more information, contact your local representative.

## N64099-E

2.68Kg

### Powerful & Lightweight Design

Packing 25% greater driving power than an N58 this tool is ideally suited to most softwood pallet applications, and with an aluminium body the N64099-E weighs in at almost 1kg less than the N71C-1-E. The rugged, steel lined canister gives long life and a new compact nose and contact arm gives greater control over fastener placement. Fires a maximum 64mm nail of 2.5mm diameter. Compact handle design and rubber comfort grip gives greater balance and improved grip for fast efficient nailing. The multi-directional exhaust allows tools to be operated adjacent to one another without air and debris causing discomfort. Includes tough top and bottom frame guards for added protection against damage.

\*Depth Control is available on this tool as a spare part

**Compact nose and contact arm** - for improved sightline and accurate placement

**Dust & debris guard** - giving operator protection from flying dust and debris

**Oversize magazine** - Easy access & greater bench stability

**Top/bottom steel frame protectors** - Added protection against damage

**Rubber comfort grip and compact handle design** - Improving operator comfort & grip

**Multi-directional exhaust** - To blow debris away from operator/job

**Integral mounting port** - for mounting on counterbalanced rig

## N71C-1-E

3.63Kg

### Superfast engine and lighter than ever

Standard durability features on the N71C-1-E include steel frame protectors and steel lined canister to ensure long life in even the toughest of working environments.

Twist-to-select nail settings make the tool versatile and quick to reload. The integral mounting port (for use with counterbalancers) also makes this tool as effective on the production line as it is in the workshop.

With rubber comfort grip handle and full dust and debris guard the N71C-1-E is the ideal tool for fasteners ranging from 35 to 70mm. Also featuring compact nose design and contact arm giving consistently accurate fastener placement.

**Compact nose and contact arm** - for improved sightline and accurate placement

**Lined nail canister with twist adjust mechanism** - For reduced wear and fast nail size changes

**Dust & debris guard** - giving operator protection from flying dust and debris

**Oversize magazine** - Easy access & greater bench stability

**Top/bottom steel frame protectors** - Added protection against damage

**Rubber comfort grip and compact handle design** - Improving operator comfort & grip

**Integral mounting port** - for mounting onto counterbalanced rig

## N89C-1-E

3.6Kg

### High power fastening with low weight construction

With 15% more power than the old N80, this tool offers a real alternative to heavier and larger tools yet, despite its compact design, it can still drive up to **90mm length ring shank fasteners** (3.1 x 90's)

This feature packed tool includes; push button depth control for fine fastener adjustment, rugged construction for long life potential, increased bench stability, steel frame protectors and anti-slip guards.

This compact tool offers outstanding driving power with reduced weight and is the ideal replacement for a wide range of tools- from the N86 and N100 to the Atro RHC1000- great for most pallet applications.

**Enlarge magazine**-Easy access & greater bench stability

**Top/bottom steel frame protectors**- Added protection against damage

**Push Button depth control**- for complete control

**Multi-directional exhaust**-To blow debris away from operator

**Integral mounting port**-for mounting on counterbalanced rig

**Enlarge magazine**-Easy access & greater bench stability

**Rubber comfort grip and compact handle design**-Improving operator comfort & grip

## N400C-1-E

5.3Kg

### Ultimate driving power for hardwood & EPAL

The powerful N400C-1-E and N401C-1-E both include a compact nose and contact arm giving a better sightline for easier placement. With secondary support handle, and hanging ports for suspended mounting, the N400C-1-E and the N401C-1-E are ideally suited to heavier applications. Oversized magazines and twist-to-select nail settings make them easier to reload too.

Fixed exhausts with mufflers provide noise suppression, whilst dust and debris shields protect the operator. Top and bottom frame protectors provide added durability in the workplace.

\*The N401C-1-E variant is specially designed to run with N100P EPAL nails.

**Compact nose and contact arm**-for improved sightline and accurate placement

**Secondary support handle**-for easier handling

**Integral mounting port**-for mounting on counterbalanced rig

**Lined nail canister with twist adjust mechanism**-For reduced wear and fast nail size changes

**Dust & debris guard**-giving operator protection from flying dust and debris

**Enlarge magazine**-Easy access & greater bench stability

**Rubber comfort grip and compact handle design**-Improving operator comfort & grip
